Projects:

Affordable Matrimony |

Affordable Matrimony could be a service that aims to provide matchmaking services at a lower cost compared to traditional matrimonial agencies. They might offer various subscription plans, one-time payment options, or free basic services with premium features available for purchase.

Tenpad |

Tenpad is a website where we can book a court for the tennis and also we can see how much matches we play , how to book a court and also can see our level which is decided from our match play.

E-commerce for Clothes |

E-commerce for Clothes is my internship mini-project. The purpose of an E-commerce website is to sell online clothes.

Online Food Delivery Website

In this website, customers place orders directly through website. They go over the menu and choose the items they want to order. After making their selection and paying for it,

CRUD Operations with Firebase

Building a simple CRUD Operations with firebase realtime database and user authentication.
